

Vuzix announces 'Works with iPhone' Apple Certified Cable with 3-D Support for Complete Line of AV Video Eyewear

Rochester, NY – April 2nd, 2009 – [Vuzix Corporation](#), the leader in video eyewear for the consumer, defense and low vision assist markets, is thrilled to announce Apple iPhone® compatibility. Every "Works with iPhone" product is designed for optimal connectivity with the iPhone® and is certified by Vuzix to meet Apple performance standards. Additionally, the cable is the first on the market that supports 3-D video in the following formats:

- Side by Side
- Interlaced
- All 3 Major Anaglyph Modes

The cable will be available bundled with the Vuzix iWear® AV230XL and available as an upgrade for all current Vuzix Video Eyewear customers for only \$39.95. Vuzix' ability to allow the consumer to upgrade their video eyewear ensures users have the latest technology without having to repurchase a whole new product.

"The iPhone® compatibility combined with the recent announcements of the Wrap 920AV and the Augmented Reality Accessory Kit keep Vuzix at the forefront of the mobile video and 3-D revolutions," said Vuzix CEO, Paul Travers. "As our products become increasingly more affordable, extensively available and highly compatible with a broad range of content types and mobile devices, the widespread adoption of Vuzix Video Eyewear is inevitable. We are excited to officially extend this compatibility to iPhone® enthusiasts worldwide," added Travers.

Vuzix continues to set the standard for innovative and high-quality Video Eyewear products. The iWear® VR920 is the world's best-selling virtual reality system while the iWear AV310 Widescreen boasts the world's first 16:9 widescreen Video Eyewear. The AV230XL is designed for the everyday consumer and features the convenience of AA-battery power and a sub-\$200 price point. The latest edition to the Video Eyewear family, the Wrap 920AV raises the bar once again with a true 'sunglass look'.
