

FOR IMMEDIATE RELEASE

Vuzix Introduces the iWear® AV920, the Video Eyewear with the Largest Viewing Screen in the Industry

62" virtual screen brings video content to life for portable electronics devices – iPods, MPEG players, portable DVD players, gaming consoles, camcorders and cell phones with video out

ROCHESTER, NY – October 15th, 2007 – Vuzix Corporation, the leading manufacturer of video eyewear and personal display devices, is proud to announce its second major product launch this fall with the introduction of the **iWear® AV920**. The AV920, with its 62-inch virtual screen and twin 640 x 480 high resolution LCD displays, brings video content to life for all electronic devices with video-out connections. Compatible devices include iPods, cell phones, portable DVD players, and gaming consoles. With a starting price of \$349, the AV920's are the perfect accessory for the business traveler, big-city commuter, college student or the technology geek that wants it all.

Weighing just 2.9 ounces, the ergonomically designed AV920 is fully adjustable for maximum comfort, includes an AccuTilt™ viewer that pivots up to 15 degrees up and down. The design allows for use with or without glasses. The speakers on the AV920 can even be moved out of the way or removed completely for users that want to plug in their own high-end audiophile or noise-canceling headphones. The AV920 also supports iWear 3-D® with a growing list of 3D DVD titles available at www.vuzix.com.

"For years, technology at this level was priced way out of the reach of the mainstream consumer," explains Paul Travers, Vuzix Corporation President and CEO. "The AV920 brings advanced optics and LCD display technology to the masses in a truly portable and comfortable form factor – and at a price that most people can afford. With the availability and popularity of video content on most portable media devices today, the market is ready for a product that allows you to view this content in a much more exciting and comfortable environment."

The iWear® AV920 is designed to connect to almost all NTSC or PAL audio/video device with video out capabilities. Some of the supported devices include:

- Portable DVD players
- Media Players

- Gaming Systems
- Digital Cameras
- Camcorders
- Cellular Phones

The AV920's features include:

- Virtual 62" screen viewed from 9-feet
- iWear 3D Enabled for automatic 2D/3D control
- Twin high-resolution 640x480 (920,000 pixels) LCD displays
- 32-degree field of view
- 24-bit true color (16 million colors)
- 60 Hz progressive scan update rate
- Rechargeable lithium ion battery with approximately 4-5 hours of continuous operation
- Removable, integrated speakers
- AccuTilt™ viewer with 15 degrees of angle
